PROFESSIONAL SUMMARY

Platform PM with 8+ years building configurable promotion, cart, and loyalty systems across e-commerce and B2B SaaS. Specialise in turning fragmented business requirements into governed rule engines – reducing logic duplication, preventing budget leakage, and accelerating campaign time-to-market. Own the backend product layer: event pipelines, identity resolution, session persistence, and incentive P&L modelling.

PROFESSIONAL EXPERIENCE

Product Lead – Pync (Acqui-hired by Snabbt)

Apr 2025 – Jan 2026 | Bengaluru, India

B2C Marketplace: Home services marketplace offering on-demand & subscription-based professional services.

- Sole product, design, and strategy authority – no CPO or CTO – owning all architecture, prioritisation, and offer mechanics decisions; scaled Pync to **₹40L+ monthly GMV** before acqui-hire.

Platform & Offers

- Designed wallet system as a core retention mechanic – rule-based earn/burn, tiered by booking type, referral incentives, capping logic to prevent single-session depletion and self-serve cohort-level loading for hyper-local promotions; high-LTV cohort (~1,500 users) saw weekly booking lift from 3 to 4, improving **LTV by 33%**.
- Modelled subscription's operating cost risk pre-launch; designed governance architecture to mitigate it – slot-visibility to prevent agents over-promising, real-time pricing sync to eliminate mis-selling, 7-day renewal alerts, and churn-triggered discount mechanics; post-launch model confirmed: LTV improved and churn fell.
- Built self-serve configuration tools for pricing, subscription tiers, and offer bundling – reduced campaign deployment cycles by ~70% and cleared 5 campaigns a month from engineering queue.

Analytics & Measurement

- Architected event tracking and attribution pipeline (Mixpanel + AppsFlyer) enabling closed-loop promotional ROI measurement and offer targeting at scale.
- Built segmentation workflows for email and WhatsApp channels using rule-based targeting logic (cohort, behavioural, lifecycle triggers) – reduced engineering dependency by 40% and enabled marketing self-serve for campaign execution.

Product & Growth – Shopflo / Flo Labs

Nov 2023 – Mar 2025 | Bengaluru, India

B2B SaaS: Checkout optimisation platform helping D2C brands boost conversions.

Cart & Promotions

- Built Shopflo's cart from zero – configurable cart, session-based persistence, threshold-unlock discount mechanics, OOS enforcement, and network-powered user identification for retargeting via merchant CEPs (LimeChat, Webengage); 200+ brand adoptions within 4 months of launch, 1–5% conversion lift, and scaled cart from **0 to ₹8L/month additional ARR**.
- Owned Shopflo's promotion rule engine powering **600+ brands** with configurable rule-based stacking logic with custom combination rules (Discount A+B permitted, B+C permitted, A+C blocked), UTM-contextual shareable links for influencer attribution (200+ brands), prepaid/promo combination rules, and bulk promo mechanics; delivering capabilities unavailable on Shopify or any competing Indian checkout platform.
- Built configurable upsell and cross-sell module at cart and checkout stage – brands defined product combination rules and layered exclusive promotional discounts on upsell items not applicable elsewhere; delivered 2–4% AOV improvement across adopting brands, materially improving ROAS for margin-constrained D2C segments.

Platform & Identity

- Led product and GTM strategy for ShopPass identity solution competing directly with existing solutions – built integration partnerships with LimeChat, Bitespeed, Webengage, and BusinessOnBot; diagnosed and rebuilt Shopflo's structurally broken partnership funnel end-to-end.
- Built Shopflo's customer-facing org from ground up – 3-member CS team segmented by customer type and 2-member KAM team covering the two highest-value brand segments; the 600+ brand relationships this org built became the primary intelligence source for every Cart, Discounts, and Upsell/Cross-sell product decision.

Program Manager | FrontRow

Oct 2021 – Oct 2022 | Bengaluru, India

B2C Edtech: platform for live celebrity and expert-led creative classes.

- Built consumer engagement and retention platform for 100K+ users; cohort-based personalised content experiences drove 20% renewal rate lift and ₹51L in incremental revenue.

Sales & Analytics – ExxonMobil

Jul 2017 – Aug 2021 | Mumbai, India

B2B Energy: Global oil and gas company providing fuel, lubricants, and chemical solutions.

- Managed \$40M B2B account portfolio; closed \$7.8M in new business through 4 rebate contracts in FY2021, exceeding quota by 18%.

CORE SKILLS & TOOLS

Product: Rule engines, discount/promotion systems, cart & checkout, product catalog management, pricing configuration systems, wallet mechanics, subscription architecture, upsell/cross-sell, funnel analytics, A/B testing, roadmap prioritisation

Technical: Event-driven pipelines, session persistence, identity resolution, SQL, Mixpanel, Amplitude, MongoDB, REST APIs, Figma

Domain: D2C e-commerce, B2B2C platforms, EdTech, B2B SaaS | GMV/LTV optimisation, merchant CEP integrations, payments integrations, CRM integrations

EDUCATION

B.E. (Hons), Manufacturing Engineering – BITS Pilani, 2013 – 2017
