PROFESSIONAL SUMMARY

Product Manager with experience building **ecosystem-driven platforms** where developer capabilities, partner incentives, and end-user workflows intersect. Experienced in owning **extensibility surfaces**, defining **API** and **permission boundaries**, and scaling partner-led growth through clear platform contracts and **self-serve tooling**. Known for strong system judgment, tight engineering collaboration, and translating ambiguous partner needs into reliable, scalable product surfaces.

PROFESSIONAL EXPERIENCE

Product Lead – Pync (Acquired)

Apr 2025 - Present | Bengaluru, India

- Built and scaled **platform foundations** enabling multi-role operational teams and external partners to safely operate and scale within a shared system.
- Designed and shipped a **role-based access control (RBAC) platform**, defining clear permission boundaries across pricing, partner management, and internal tooling, enabling faster partner onboarding without compromising system safety.
- Partnered closely with engineering to **implement access policies, API contracts**, and **audit mechanisms**, balancing rapid iteration (3–4 day release cycles) with long-term platform integrity.
- Built **self-serve configuration** and **pricing workflows** that reduced dependency on engineering by **80%**, allowing operations and partner teams to independently launch and iterate offerings.
- Led end-to-end **delivery of platform capabilities**, setting success metrics and execution plans that reduced time-to-market by 70%.
- Scaled the platform to **10,000 DAU within 6 months**, driving a 125% improvement in conversion and ~₹40L in monthly revenue through partner-enabled growth loops.

Product Strategy, Partnership & GTM – Shopflo / Flo Labs

Nov 2023 - Mar 2025 | Bengaluru, India

- Operated as an **independent SaaS extension on top of Shopify**, with core product decisions constrained by platform APIs, permission models, and upstream change risk.
- Built and scaled a SaaS product as a **platform extension**, designing API integrations, permission scopes, and failure handling to align with platform constraints while delivering merchant-facing workflows.
- Defined and executed **platform integration strategy** across payments, CRM, and conversational commerce partners, establishing API standards and access patterns used by 500+ merchants.
- Owned **OAuth-based authentication integrations**, including token exchange, scopes, and failure handling, ensuring reliable partner integrations and clear trust boundaries.
- Designed a **first-party identity resolution layer** to maintain persistent user state across authenticated sessions, enabling secure event attribution and partner-driven personalization.
- Partnered with engineering to design **secure API contracts and event ingestion pipelines**, explicitly modeling failure modes to protect platform reliability at scale.
- Scaled the product from **10 to 500+ customers in 12 months**, driving 52% ARR growth (~\$1.5M) through ecosystem-led adoption and enterprise positioning.

Program Manager | FrontRow

Oct 2021 - Oct 2022 | Bengaluru, India

- Built and scaled a **community platform to 100,000+ users**, improving retention through engagement loops and cross-functional delivery.

Sales & Analytics – ExxonMobil

Jul 2017 – Aug 2021 | Mumbai, India

- Managed a **\$40M B2B account portfolio** and built Salesforce-based forecasting dashboards to improve pipeline visibility in a global, matrixed organization.

EDUCATION

B.E. (Hons), Manufacturing Engineering – BITS Pilani

PLATFORM & TECHNICAL STRENGTHS

- **Ecosystem & Integrations:** ISV partnerships, platform onboarding, API standards, extensibility surfaces
- **Identity & Access:** OAuth integrations, RBAC systems, role-based permissions, session-aware authorization
- **Platform Design:** Self-serve admin tools, configuration systems, pricing and entitlement workflows
- **Product Analytics:** Funnels, cohort analysis, experimentation, metric definition

AI & INTELLIGENCE SYSTEMS

- Experience applying **AI-assisted tools** to improve product discovery, prioritization, and execution efficiency.
- Hands-on exploration of **agent-oriented context management** patterns for LLM-based systems, with focus on reliability, memory boundaries, and human-in-the-loop controls.
- Applied selectively within **platform and workflow constraints**, prioritizing reliability, clarity, and human override over autonomous behavior.
